Title: CV using html/css

Assignment 1 — Your Personal CV Page

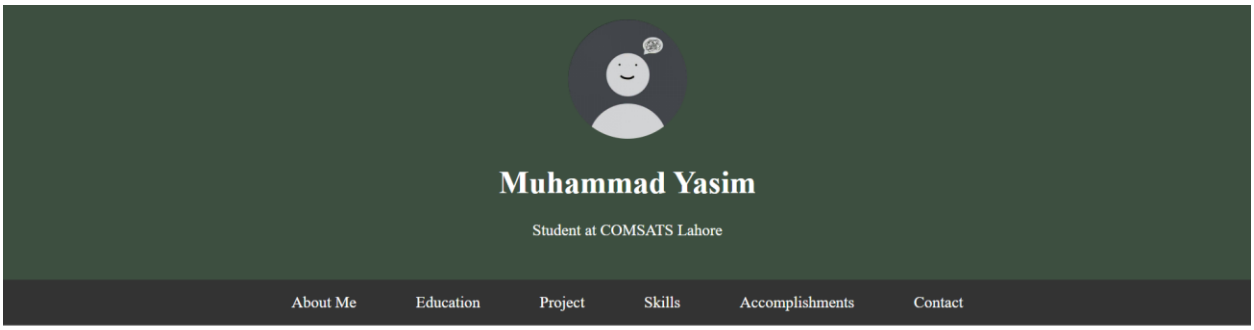

Difficulty: Foundational · **Covers:** Lectures 3–6 (HTML & HTML5, Semantic HTML and Forms, CSS Fundamentals, the CSS Box Model) · **Folder:** `assignment-1/`

Task: Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

Your page must include, at minimum:

- A header with your name, a short professional tagline, and a photo (a placeholder image is fine).
- An "About Me" section.
- An "Education" section listing your academic history in a semantic list or table.
- A "Skills" section.
- A "Contact" section with a real `<a href="mailto:...">` link and at least one social/portfolio link.
- Correct use of semantic HTML5 elements throughout — `<header>`, `<nav>`, `<main>`, `<section>`, `<article>`, `<footer>` as appropriate, not a page built entirely out of unstyled `<div>`s.
- Styling entirely in a separate `styles.css` file (external stylesheet, not inline `style=""` attributes) using the box model correctly — sensible margins, padding, and borders, not everything jammed against everything else.

Muhammad Yasim

Student at COMSATS Lahore

About Me | Education | Project | Skills | Accomplishments | Contact

About Me

Computer Science student with strong foundations in Java, DSA, and Software Engineering. Experienced in building academic and real-world applications, including a deployed farmer management system, POS system and Grocery App. Skilled in Java, Python, frontend development, and system analysis. Have hands-on experience in testing and debugging edge cases. Passionate about Data Science and creating reliable, data-driven solutions while continuously learning new technologies.

Education

- **Bachelor of Computer Science**
  Comsats University Islamabad, Lahore (Present)
  Current Semester: 5th
- **Intermediate: ICS (1050/1200)**
  Punjab College, Lahore (2024)
- **Matric: Computer Science (1071/1100)**
  Rangers Public School, Lahore (2022)

Projects

Pasha Traders Mobile App

- Worked on a mobile application for a wholesale grocery business.
- Included features such as product categories, makers, quantity-based pricing, cart, product details, and customer orders.
- Designed the application to integrate with the existing POS and business system.
- App Link: Pasha Traders App

POS System

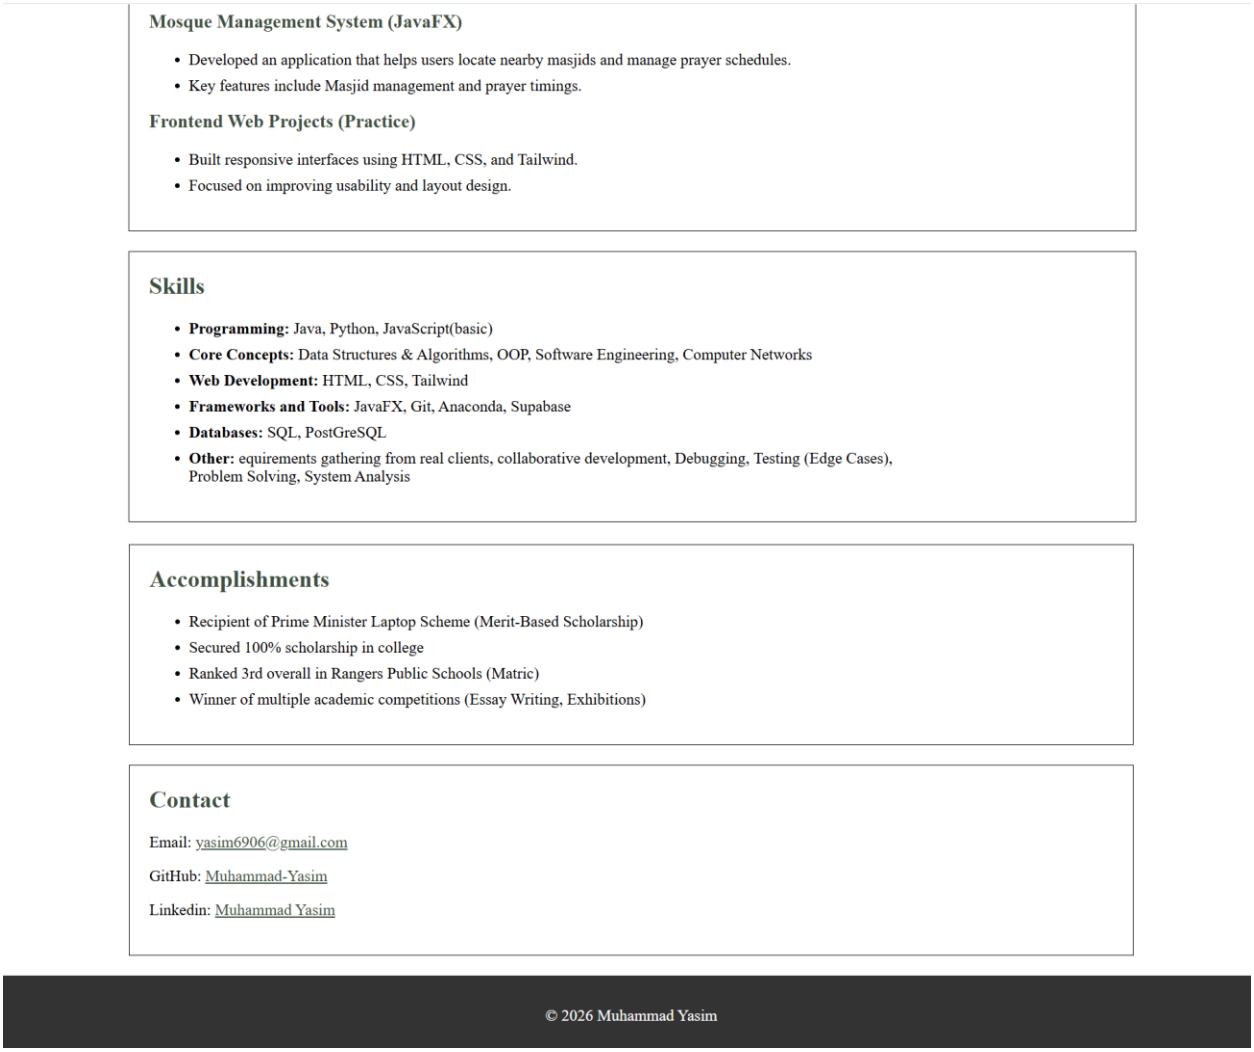

- Worked on a web-based Point of Sale system for managing products, sales, inventory, and store operations.
- Worked on database integration and different user roles.
- Focused on making the interface simple and easy to use.
- POS Link: Haven POS

Farmer Management System

- Developed and deployed a production-level application for managing workers, wages, invoices, reports, attendance, and land leasing with proper security and calculations.
- Built using MERN stack with SQL and Supabase integration.
- Gathered user requirements and performed extensive manual testing, covering major/minor bugs and edge cases to ensure reliability.
- Currently being actively used in a real farming environment.
- Live: Syed Agriculture Farm

Data Structures Visualizer (JavaFX)

- Built an interactive application to visualize different data structures like linked lists, stacks, and queues.
- Helped users understand operations step-by-step through animations.
- Strengthened DSA concepts and UI integration.

Mosque Management System (JavaFX)

- Developed an application that helps users locate nearby masjids and manage prayer schedules.
- Key features include Masjid management and prayer timings.

Frontend Web Projects (Practice)

- Built responsive interfaces using HTML, CSS, and Tailwind.
- Focused on improving usability and layout design.

Skills

- **Programming:** Java, Python, JavaScript(basic)
- **Core Concepts:** Data Structures & Algorithms, OOP, Software Engineering, Computer Networks
- **Web Development:** HTML, CSS, Tailwind
- **Frameworks and Tools:** JavaFX, Git, Anaconda, Supabase
- **Databases:** SQL, PostGreSQL
- **Other:** equirements gathering from real clients, collaborative development, Debugging, Testing (Edge Cases), Problem Solving, System Analysis

Accomplishments

- Recipient of Prime Minister Laptop Scheme (Merit-Based Scholarship)
- Secured 100% scholarship in college
- Ranked 3rd overall in Rangers Public Schools (Matric)
- Winner of multiple academic competitions (Essay Writing, Exhibitions)
